Dear Dr

I hope that
you will push the matter
and do the best possible
with the plates. I just to be
had - reproduce as suggested

We hope that you are
now comfortably settled at
home and over the first
rust of work -

I have not as yet
taken any step. But will
write to all parties about
Herbarium work before
leaving this summer -

I would like to have some
positive knowledge of what
can be done to show the
Shaw

He must give me a
definite statement before next
winter - With kindest regards
to Mr. Gray and yourself
from Mr. E. and self

Sincerely yours

Geo. Engelmann
